- GraphQL
-

PERSONAL SUMMARY

An experiment coder, and enthusiastic Software Developer who has a long record of developing, implementing and testing software to meet specific project requirements. I have extensive experience of coming up with software solutions designed to meet business and company requirements. I worked as a freelancer and a full stack developer at bunisha limited. enjoys working closely with others, and has an eye for detail and identifying problems. Right now, I'm work on side open-source project and looking for a suitable position with a company that places a strong emphasis on the growth and development of its employees. In the future I see myself as a senior software developer, creating specialized software for leading industrial organizations at the head of their respective fields.

EXPERIENCE

ICT INTERN • CATHOLIC UNIVERSITY OF EASTERN AFRICA • JAN, 2019 -- SEP, 2019

- Worked as an ICT intern and web developer with the ICT team department implementing library system and online school management system
- Help the team in upgrading the institute website from using old technology to latest tech stack e.g Laravel, Vuejs and Docker

FULL STACK DEVELOPER • BUNISHA LIMITED • AUG, 2020 -- JAN, 2021

- Design a human resource management system interface and implemented using HTML and SASS
- Developed API end point using Laravel framework and MySQL
- Develop a front-end using Vuejs a JavaScript framework
- Used Docker as a deliver container software in packages
